

Second Workshop on Impact Chains: *Sector-based Analysis*

Balihal Bay Hotel

Pattaya, 27th-29th June 2016

On behalf of:

Federal Ministry
for the Environment, Nature Conservation,
Building and Nuclear Safety

of the Federal Republic of Germany

Agenda of today (day 3)

08.15-08.30	Finalization of sensitivity/adaptive capacity matrix
08.30-09.30	Interactive exchange on working group results and horizontal linkages (carousel exercise) <i>By All participants</i>
09.30-09.50	Sector-internal reporting and integration of received feedback <i>By All participants</i>
09.50-10.30	Presentation and discussion of working group results + Q&A <i>By All participants</i>
10.30-10.45	Coffee break
10.45-11.15	What's next? From impact chains to adaptation measures: quantifying impact chain components with available (sectoral) data and indicators <i>By GIZ's expert</i>
11.15-12.00	Group work: Quantifying sensitivity and risk factors
12.00-13.00	Lunch (+check-out)
13.00-14.00	Group work: Quantifying sensitivity and risk factors (cont.)
14.00-14.30	Report quantification sources to plenary <i>By All participants</i>
14.30-15.00	Summary and closing <i>By ONEP and GIZ Representatives</i>
15.00-15.30	Coffee Break and departure to Bangkok

Carousel exercise (08.30-10.30)

Aim:

1. **Get an overview of other sectors'** impact chains and sensitivity and adaptive capacity matrixes → **what are the linkages to your own sector?**
2. **Share your thoughts** and remarks to improve/strengthen your colleagues' work.

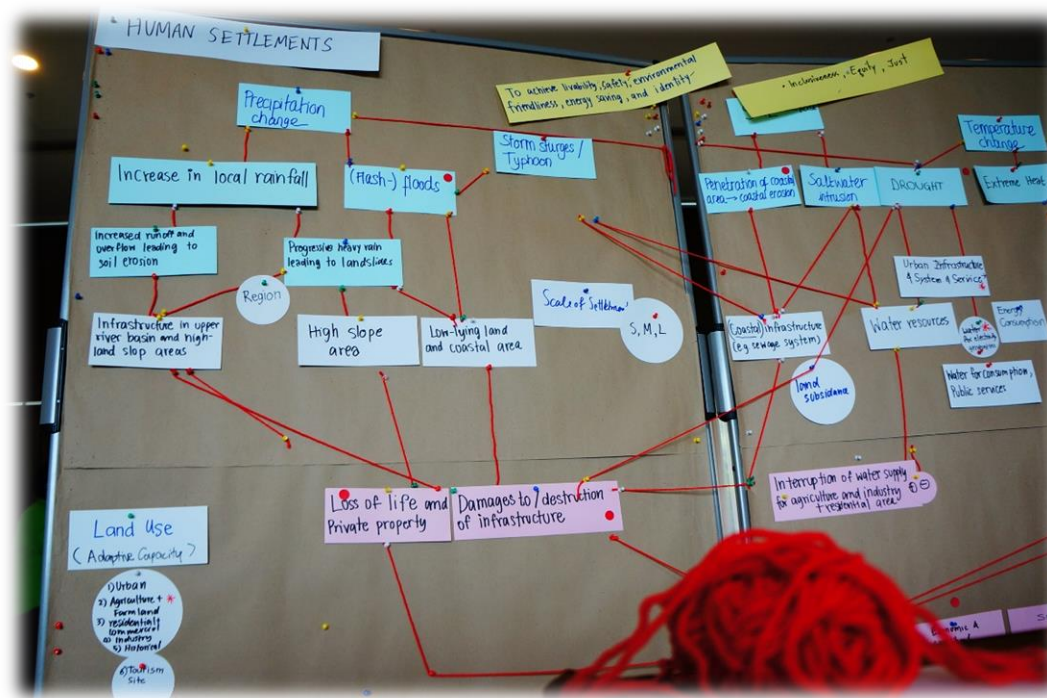

How?

1. Select one group member who will stay with his/her sectoral impact chain to present it to the other groups (he/she will be the **reporter**).
2. The reporter has 5 min to **present** the impact chain/matrix to his/her audience.
3. The audience has 5 min to ask questions and **give feedback**.
4. There is a **rotation** to the next board every 10 min.
5. At the end of the carousel: brief your sectoral colleagues on the received feedback and **integrate** it to the impact chain/matrix.
6. Report to **plenary** on the overall group work and new insights (5min/group).

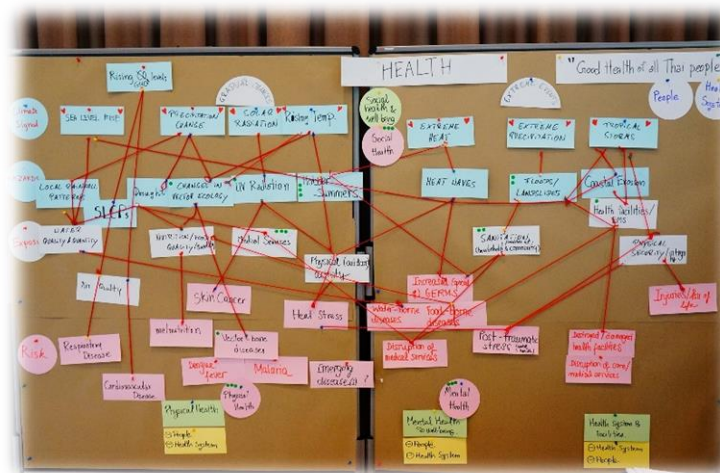

Summary & Reflections

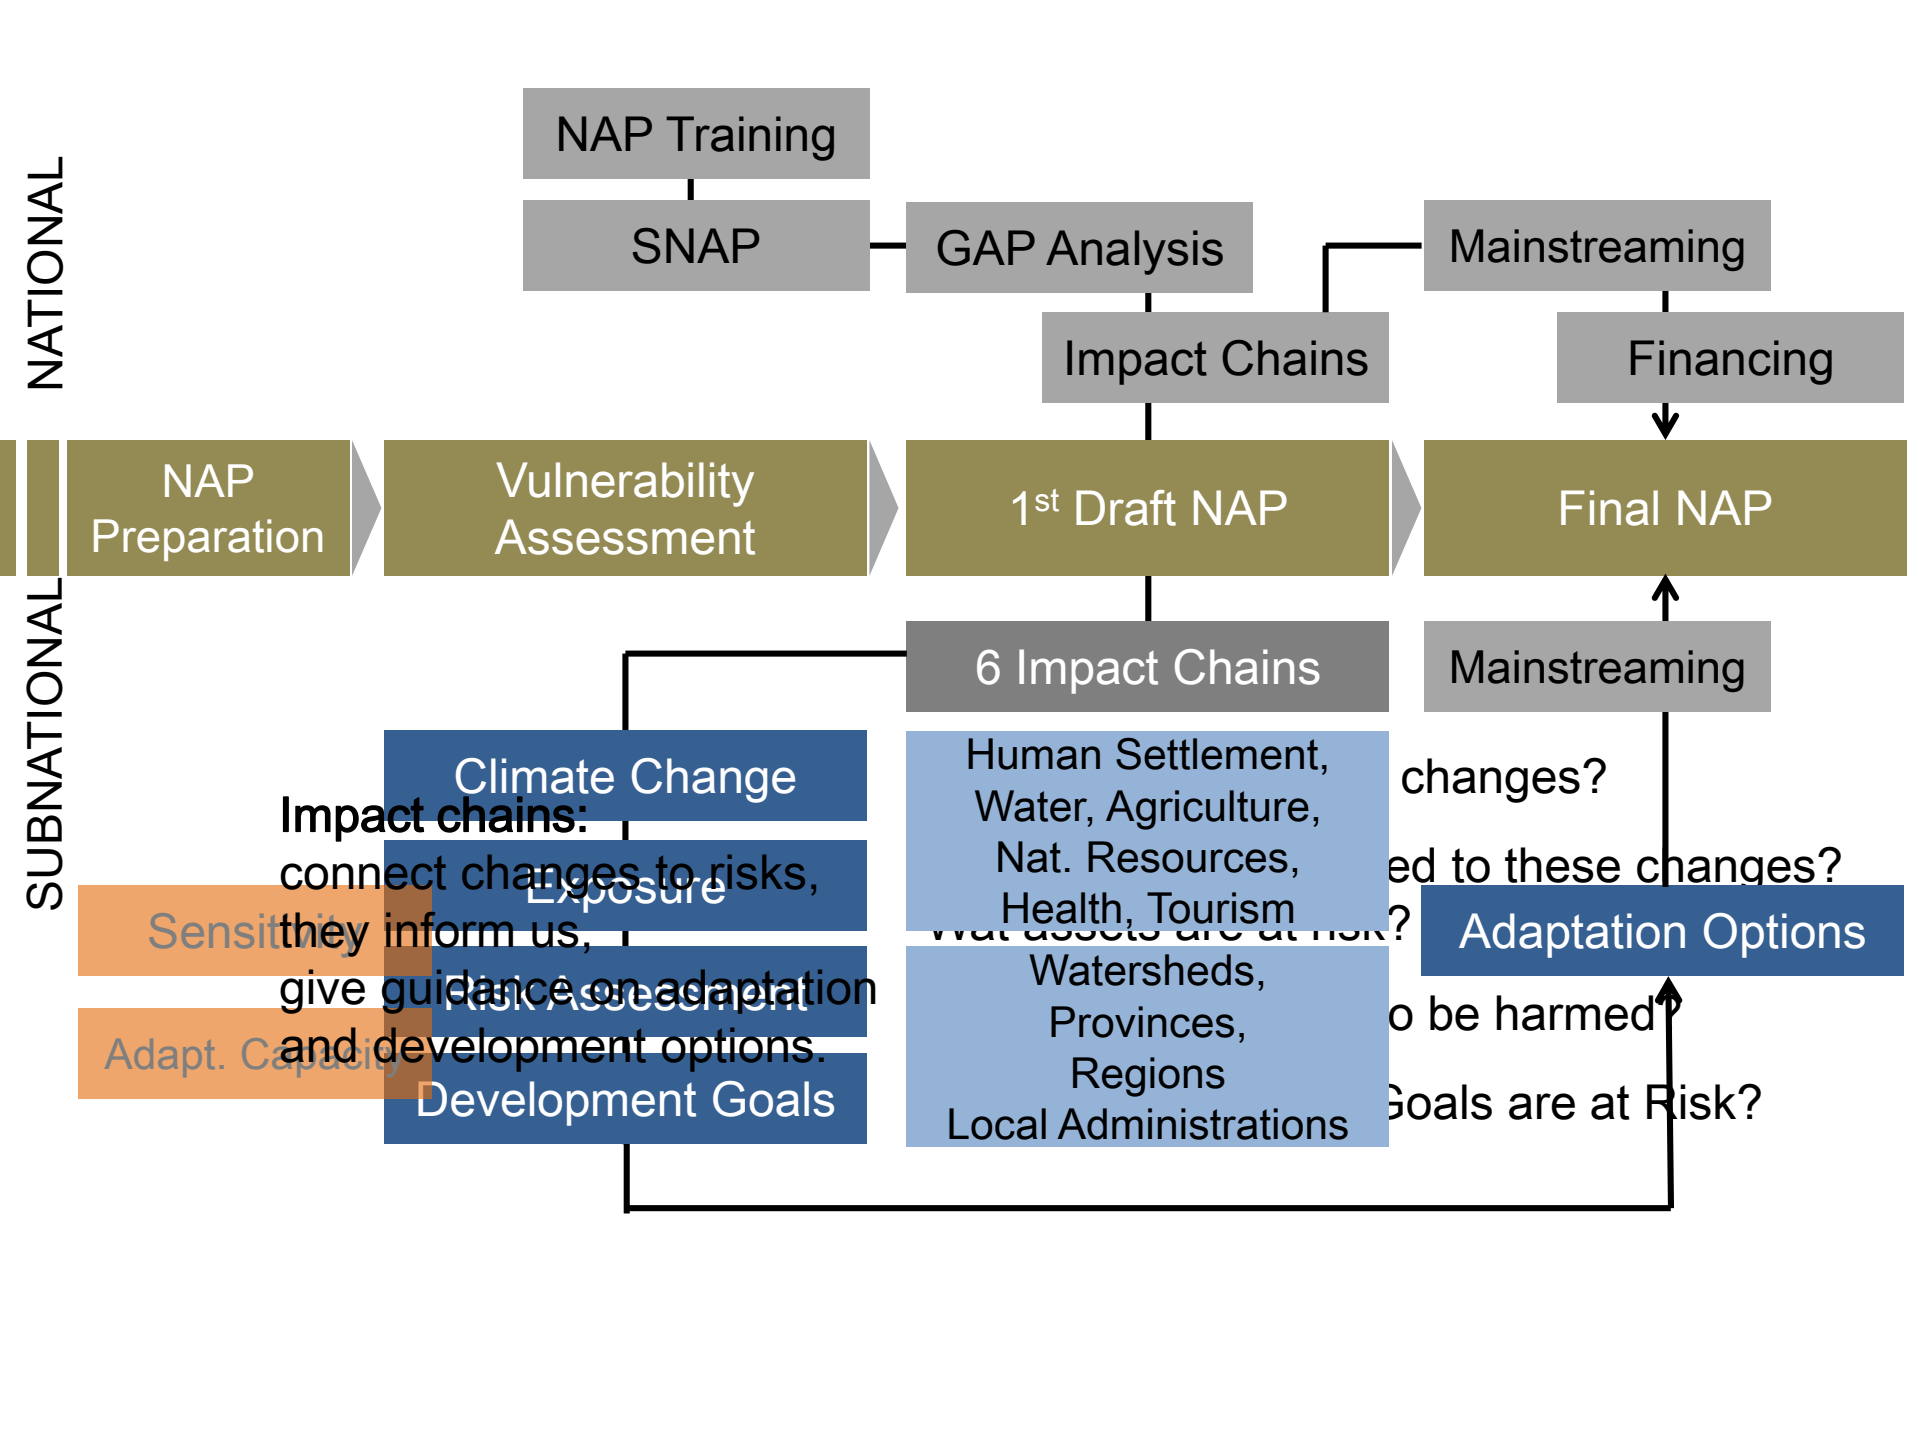

For me/for my sector, the impact chain methodology is...?

Next steps

Next steps

July

- **Finalization** of a *first version* of the sector-based, national impact chains

Aug-
Sept

- **Integration/use** of the sectoral impact chains as an input [visualization/source of information] for the first NAP draft

Sept-
ember

- **Presentation** of finalized impact chains in the frame of the Second *NAP Expert Platform Meeting*

No/Dec
ember

- **Building** on the first NAP draft, elaborate area-based impact chains at the sub-national level (throughout **2017**)

What *can* you do?

- **Share your knowledge** about the impact chain methodology in your home administration
- **Quantify** your impact chain with existing data
- After (!) quantifying your impact chain components: **define and discuss sectoral adaptation options/measures**
- Think about **indicators** for each adaption measure (baseline + target) to be able to monitor adaptation measures
- Elaborate **specific sub-sector** climate change impact **chains**
- ... **stay tuned** for more involvement and participation in the NAP process!

Thank you!
