

The image features a minimalist design with three overlapping circles. A large light gray circle is on the left. A medium brown circle overlaps its right side, containing the word 'giz' in red. To the right of the brown circle is a medium orange circle, which overlaps the brown circle's right edge. A thin vertical black line is positioned between the brown and orange circles. The word 'THAILAND' is written in black capital letters inside the orange circle, with a row of ten dots below it.

ABOUT GIZ

“WE WORK TO SHAPE A FUTURE WORTH LIVING AROUND THE WORLD.”

GIZ

- is a service provider in the field of **international cooperation for sustainable development**.
- is owned by the **Federal Republic of Germany**.
- operates in around **120 countries** and employs about **20,000** staff worldwide.
- works across a wide range of sectors for customised, innovative solutions.
- manages **change**, provides **know-how** and develops **solutions** to make development sustainable worldwide.

ABOUT GIZ THAILAND

The focus of Thai – German Cooperation

Since the inception of the Thai-German cooperation, more than 300 projects have been implemented by GIZ to support Thailand in achieving its development goals. With Thailand's rapid and successful transformation into a newly industrialised country, the focus of the cooperation shifted from vocational education, rural and agricultural development to environmental and climate protection. Today, climate change and its integration across key economic sector drives GIZ's work in Thailand.

HOW WE WORK

We leverage GIZ's close and longstanding relationship with various ministries, institutes, academia as well as private sector in Thailand.

Our projects are jointly agreed between the Thai and the German Government based on the Thai-German Framework Agreement on Development Cooperation.

Our teams of national and international experts work closely with partner institutions who receive tailored-made expertise through workshops, trainings and conferences.

Climate

Climate change is the cornerstone of the Thai-German cooperation. GIZ Thailand supports the Thai Government to develop its climate change policy on mitigation and adaptation. We support our partners in key sectors to implement concrete measures that contribute to the implementation of the Paris Agreement.

Private Sector Cooperation

Private sector cooperation adds impact and sustainability to **public donor money**. GIZ Thailand is leveraging private investments in the food & agriculture, health and transport and other sectors to complement partners' strength and create sustainable structures.

Training Hub

GIZ's regional centre of excellence for learning – **the Academy for International Cooperation (AIZ) Bangkok** – offers high-quality trainings and seminar courses in a wide array of topics and management focus areas. AIZ Bangkok works with renowned local and international trainers and customises training services to clients' needs.

GIZ THAILAND'S MAIN DONORS

FIELDS OF WORK

Agriculture and Food Safety

- Sustainable agriculture
- Trade for agricultural goods
- Low-emission rice production
- Crop insurance

Climate Change Policy

- Support for the development of climate policies
- Sub-national implementation of climate change targets
- Climate finance readiness
- Monitoring system

Energy

- Renewable energy policies
- Innovative start-ups
- Software solutions
- Energy planning

Urban & Industrial Development

- Innovative infrastructure for solid waste and water management
- Mobilisation of finance
- Climate-friendly cooling sector
- Market introduction of climate technology

Transport

- Sustainable transport system
- Public transport system
- Freight transport and logistics
- Fuel economy policies

Waste & Resource Management

- Mitigation strategies
- Municipal waste management
- Circular economy and life cycle assessment
- Eco-labeling and green public procurement

Water

- Disaster risk management
- Ecosystem-based adaptation measures
- Water management in watersheds
- Integrated water resources and river basin management

Vocational Training

- Technical and vocational education for healthcare workers
- Quality and labour-market orientation of TVET (ASEAN level)
- Future workforce

Good Governance

- International dialogue on drug policy
- Bilateral cooperation with countries in Asia, Africa and Latin America

Trilateral Cooperation

- Implementation of joint projects with Thailand International Cooperation Agency in neighbouring countries
- Capacity development for participating Thai agencies

Total value of projects since 2009
Implemented bilaterally in Thailand, regionally from Thailand or with Thai-German trilateral cooperation approach.
