

Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH is a service enterprise for development cooperation with international operations and global experience. Owned by the Federal Republic of Germany, the organization operates as a private-sector enterprise with a development policy mandate to make sustainable improvements to the living conditions of people in the countries we operate in. GIZ has a record of more than 60 years of working experience in Thailand.

The Thai-German Cooperation on Energy, Mobility and Climate (TGC-EMC) project is a Thai-German bilateral project funded by the German Federal Ministry for Economic Affairs and Climate Action (BMWK) under the International Climate Initiative (IKI) is currently looking for an Intern.

INTERN (TGC EMC-Transport)

The Thai-German Cooperation on Energy, Mobility and Climate (TGC-EMC) is a bilateral program under the International Climate Initiative (IKI) supported by the German Federal Ministry for Economic Affairs and Climate Action (BMWK). The programme aims to support the acceleration of Thailand's energy transition, ensuring compatibility between economic growth and high climate ambitions. A key component of this programme looks into the "Decarbonization of the Transport Sector" and will focus on transport sector electrification, EV battery technology development and integration with renewable energy-based electricity production, charging infrastructure roll-out and EV grid integration.

Focusing on the two most important sectors in terms of emissions, the project will moreover support the operationalization of the power and transport transition through technology and knowledge transfer as well as policy, regulatory and business model development support. A clear focus will be put on sector coupling to encourage the tackling of issues shared across sectors which slow the energy transition. This cross-sectoral support to implementation will translate into City Labs where the technical, regulatory and business support will be operationalized along with local stakeholders in an urban set up, integrating a scaling-up plan. Finally, the project will provide significant support in the field of climate finance. The Thai Climate Finance Initiative (ThaiCI) will provide seed funding to a number of local projects along with capacity development to both the funding manager and potential recipients.

The **Intern** will carry out the following tasks:

- Assist in the research of relevant information for the project in both Thai and English languages (incl. translation of documents)
- Assist in the development of presentations, visualization materials and other knowledge products and knowledge-sharing activities in both Thai and English language
- Assist in preparing administrative management of project events such as trainings, workshops, meetings, etc.
- Assist in the interactive execution of project virtual and physical events
- Assist in the development of presentations, visualization materials and other knowledge products and knowledge-sharing activities in both Thai and English language
- Assist in the preparation of communication and PR content such as newsletters, articles, video presentation, and social media posts in both Thai and English language (incl. translation of documents)
- Other relevant tasks assigned by the project team

Applicants are not required to have professional work experience but are encouraged to list all relevant work experiences in their application, as well as interests, skills and knowledge. To qualify for an internship with the TGC-EMC project, the following conditions should be met:

- Master/ Senior bachelor's students in sustainable development, transport engineering, public or development policy, or related fields.
- Excellent writing and editing skills in both Thai and English in which key message is clearly identified and presented nicely in a logical way
- Strong interest in sustainable development, climate change, electric mobility and / or transport-related topics
