

As an international cooperation enterprise with worldwide operations, the German government-owned Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH operates on behalf of German ministries, the governments of other countries and international clients to provide tailor-made, cost-efficient and effective services for sustainable development. With over 60 years of experience implementing projects in Thailand, GIZ provides policy and technical advice on various topics and sectors relating to Thailand's reform process, including: climate policy, sustainable economic development, and sustainable agriculture.

Senior Field Staff (Lower Northern Area)

We are looking for a **Senior Field Staff** to support the project “**Thai Rice: Strengthening Climate-Smart Rice Farming**”, to be implemented by GIZ with four executing entities. The Green Climate Fund (GCF) has approved a 38-million euro grant contribution towards the project. The co-financing is provided by Thai public sector partners, and executing entities, including the Thai Rice Department, the Bank for Agriculture and Agricultural Cooperatives (BAAC), the Office of Natural Resources and Environmental Planning (ONEP), and the International Rice Research Institute (IRRI). The project is supported by the German Federal Ministry for Economic Cooperation and Development (BMZ) and international private sector partners. Further information: <https://www.greenclimate.fund/project/fp214>.

Thai Rice GCF: Strengthening Climate-Smart Rice Farming

Rice is Thailand's most important food crop, accounting for roughly half of agricultural land and employing 18 million smallholder farmers. Rice farmers are among the poorest occupational groups in Thailand. They are extremely vulnerable to climate change: rice farming is a water-intensive and temperature-sensitive activity conducted in a climate that is becoming increasingly characterised by longer dry spells and higher temperatures. At the same time, rice farming is a significant contributor to greenhouse gas emissions. Smallholder farmers have limited capacity to adapt, given their small farm sizes and low incomes, and their limited access to technical assistance, markets and credit.

The “Thai Rice: Strengthening Climate-Smart Rice Farming” project aims to promote low-emission and climate-resilient rice farming. It aims to benefit more than 250,000 smallholder farmers – strengthening their yields, livelihoods, food security, and ability to cope with climate risks. It also has potential to mitigate 2.4 million tonnes of CO₂ equivalent. The project follows a bottoms-up logic: empower vulnerable smallholder farmers to make improved decisions in the face of climate change and scale access to climate-smart farming technologies. Policy-makers will be supported with technical assistance, monitoring tools, and organizational support to achieve a more ‘joined up’ institutional and policy environment for climate-smart rice. Governments across the region will benefit through knowledge sharing and peer-to-peer learning.

Job highlights:

- Job with purpose: Work for a paradigm shift in Thai rice farming to achieve ambitious climate targets
- Pioneering topics: Enable efficiency and compliance for ambitious impact
- Dynamic team: Join an international and dedicated team

The **Senior Field Staff for the Lower North Office** will carry out the following tasks.

Responsibilities

Project coordination and management:

- Develop operational plan and steer executions of all field-based project activities in lower northern part of Thailand
- Provide strategic and technical advice along with actionable recommendations to improve the impact and efficiency of field-based project activities
- Design training plan of the field teams to achieve the requirement of GCF Funding, private partners and support the training program of public partners to achieve project indicators.
- Coordinate with / support local governmental (ie, RD, DoAE, BAAC, etc.) and private partners based on need and request
- Oversee the setup, maintenance, and success of demonstration plots, farmer field days, and other promotional events
- Lead data collections and monitoring efforts to track and evaluate effectiveness of field activities
- Identify challenges and areas for improvement in field operations
- Build and maintain strong relationship with local authorities, farmer groups, and stakeholders
- Maintain regular progress update with team leads and ensure all relevant administrative tasks, including logistics and procurement, are in place.
- Ensure that Environmental and Social Safeguards Checklist is incorporated and verified
- Support field administrative and financial tasks in coordination with Office and Finance Manager in Bangkok
- Support procurement for office equipment, office supplies and other required assets, as well as oversee field office's asset management and maintenance.

Communication and knowledge management:

- Support a field manager in developing on-ground training strategies to improve project implementation
- Identify and develop knowledge products for internal and external audiences
- Liaise with partners to develop relevant communication materials and outreach activities
- Assist with research activities and studies which benefit the project
- Support coordination with other GIZ projects in Thailand and in the region

Qualifications:

- Thai nationality only
- Bachelor's Degree in a relevant field, e.g. Agriculture, Environmental Science, Business Administration, Public Administration or related fields
- 10 years of professional working experience in a similar position or related field
- Substantial experience working with local government, community engagement or capacity building
- Previous experience in regenerative agriculture projects or working with smallholder farmers (particularly in corn and cassava farming) is highly preferred
- Demonstrated skills in communication and interpersonal skills
- Fluent in spoken and written Thai; proficiency in English is an advantage
- Good working knowledge of MS Office package (Word, Excel and PowerPoint) and Microsoft Teams
- Willingness to travel in accordance with project requirements

Personal attributes and competencies:

- Self-motivated, flexible and resourceful
- Good organizational and conceptualization skill
- Hands-on mentality and detail-oriented work ethics
- Ability to work independently and in a team

- Ability to work under time pressure and meet deadlines with strong attention to consistency, details, and quality
- Interest and desire to work in a cross-cultural context, climate change mitigation and adaptation, and sustainable agriculture value chains.
- Strong interpersonal skills with the ability to coordinate with diverse partners and stakeholders

Duty station and timeframe:

The position will be based in the Lower North Office to implement the work in Nakornsawan, Pitchit, Kampangetch, Pitsanulok and will report to the Project Director in GIZ Thailand. This will be a fixed-term contract, starting as soon as possible and running until 31 December 2025, with possibility of extension.

Please carefully read this announcement and **submit a CV AND a cover letter in English** to aronratt.soontonbura@giz.de.

The **deadline for applications is 31 December 2024**. Only shortlisted candidates will be contacted.

GIZ Thailand is an equal opportunity employer and actively encourages gender diversity within the company and operations.
