

Request for Quotation

Required product: 3 Pickup Vehicles with Hard Top Canopies
Delivery place: GIZ Agriculture & Food Cluster, Bangkok

Ladies and Gentlemen,

The Green Climate Fund (GCF) has approved a 38-million euro grant contribution towards the project. The co-financing is provided by Thai public sector partners, and executing entities, including the Thai Rice Department, the Bank for Agriculture and Agricultural Cooperatives (BAAC), the Office of Natural Resources and Environmental Planning (ONEP), and the International Rice Research Institute (IRRI). The project is supported by the German Federal Ministry for Economic Cooperation and Development (BMZ) and international private sector partners.

The “Thai Rice: Strengthening Climate-Smart Rice Farming” project aims to promote low-emission and climate-resilient rice farming. It aims to benefit more than 250,000 smallholder farmers – strengthening their yields, livelihoods, food security, and ability to cope with climate risks. It also has potential to mitigate 2.4 million tons of CO₂ equivalent. The project follows a bottom-up logic: empower vulnerable smallholder farmers to make improved decisions in the face of climate change and scale access to climate-smart farming technologies. Policymakers will be supported with technical assistance, monitoring tools, and organizational support to achieve a more ‘joined up’ institutional and policy environment for climate-smart rice. Governments across the region will benefit through knowledge sharing and peer-to-peer learning.

The “Thai Rice: Strengthening Climate-Smart Rice Farming” project requests each bidder to offer for 3 pickup vehicles with hard top canopies according to the minimum specifications as stated in Terms of Reference. The offer shall contain the price per unit, with confirmation that the service centers will be available nationwide for maintenance and fixing after sales.

Please see Specification below for your consideration.

Pickup Vehicles

Engine type	At least 2.4 L, 4-cylinder diesel
Transmission type	At least 5-speed automatic
Displacement	At least 2,400 cc
